

Science & Technology

1. Electrons are larger than atoms.
2. The Sun is a star.
3. Sound can travel through a vacuum.
4. DNA stands for Deoxyribonucleic Acid.
5. Humans can naturally breathe underwater without equipment.
6. The freezing point of water is 0°C.
7. Mercury is the hottest planet in the Solar System.
8. Plants convert sunlight into energy through photosynthesis.
9. Newton discovered gravity after seeing a falling apple.
10. Vaccines help the immune system recognize diseases.

Geography

11. Canada is the second-largest country by land area.
12. The Pacific Ocean is the smallest ocean on Earth.
13. New Delhi is the capital of India.
14. Africa has more countries than Europe.
15. Antarctica is the driest continent on Earth.
16. Brazil is located in South America.
17. The Amazon Rainforest is mainly in Australia.
18. China shares a border with India.
19. Greenland is larger than India by area.
20. The equator passes through Egypt.

History

21. The Internet was invented before computers.
22. The Titanic sank in 1912.
23. The Great Wall of China was built in a single year.
24. Julius Caesar was a Roman emperor.
25. India gained independence in 1947.
26. The printing press was invented by Johannes Gutenberg.
27. The Cold War involved direct large-scale war between the USA and USSR.
28. Mahatma Gandhi played a major role in India's freedom movement.
29. The first Olympic Games originated in Greece.
30. Napoleon Bonaparte was born in France.

Computers & Programming

31. Java supports object-oriented programming.

- 32. A compiler converts source code into machine code.
- 33. RAM is permanent storage memory.
- 34. The Internet and the World Wide Web are exactly the same thing.
- 35. Python supports multiple programming paradigms.
- 36. An IP address identifies a device on a network.
- 37. CSS is used for styling web pages.
- 38. JavaScript can only run in browsers.
- 39. Open-source software allows users to modify source code.
- 40. HTTP stands for HyperText Transfer Protocol.

Sports

- 41. Basketball was invented in the United States.
- 42. A cricket team has 15 players on the field during play.
- 43. Wimbledon is a tennis tournament.
- 44. Chess is an Olympic sport.
- 45. The FIFA World Cup is held every four years.
- 46. Virat Kohli is associated with cricket.
- 47. A red card in football usually means a player is sent off.
- 48. Kabaddi originated in India.
- 49. Formula 1 is a type of motorcycle racing.
- 50. The IPL is related to basketball.

General Knowledge

- 51. The human heart has four chambers.
- 52. Penguins can fly naturally.
- 53. Diamonds are made primarily of carbon.
- 54. The Eiffel Tower is located in London.
- 55. An octagon has eight sides.
- 56. Cows are carnivores.
- 57. The currency of Japan is the Yen.
- 58. Solar eclipses occur every day.
- 59. Mount Everest is the tallest mountain above sea level.
- 60. Bats are blind.

AI / ML Related

- 61. Deep Learning is a subset of Machine Learning.
- 62. AI systems always think exactly like humans.
- 63. Training data is used to teach machine learning models.
- 64. Overfitting occurs when a model performs well only on training data.
- 65. TensorFlow is a machine learning framework.

- 66. Reinforcement Learning involves rewards and penalties.
- 67. Chatbots cannot use Natural Language Processing.
- 68. GPUs are often used for training deep learning models.
- 69. Data preprocessing is unnecessary in machine learning projects.
- 70. Computer Vision deals with understanding images and videos.

Mathematics

- 71. A triangle has four sides.
- 72. Pi is approximately equal to 3.14159.
- 73. Zero is an even number.
- 74. The square root of 64 is 8.
- 75. Prime numbers are divisible only by 1 and themselves.
- 76. 100 is a prime number.
- 77. The sum of angles in a triangle is 180 degrees.
- 78. Negative numbers cannot be multiplied.
- 79. Algebra deals with symbols and equations.
- 80. Infinity is a negative number.

Space & Astronomy

- 81. The Moon produces its own light.
- 82. Mars is often called the Red Planet.
- 83. The Sun revolves around the Earth.
- 84. Black holes have strong gravitational pull.
- 85. Jupiter is the largest planet in the Solar System.
- 86. Pluto is officially classified as a dwarf planet.
- 87. Astronauts experience gravity exactly the same as on Earth.
- 88. Saturn is known for its rings.
- 89. Venus is the closest planet to the Sun.
- 90. A light-year measures distance, not time.
